

## Action by Missouri Clean Water Commission

Date of Action: September 7, 2005

Water Body:

Name: Turkey Creek  
Classification: C  
Identification #: 0199  
Length of Segment: 1.5 miles  
County (ies): Lincoln

Use Attainability Analysis (UAA) Finding(s):

A whole body contact (WBC) recreational UAA was submitted by department staff on July 14, 2005. The UAA was submitted to evaluate Criterion #2: Natural, Ephemeral, Intermittent or Low flow conditions.

Review Committee Recommendation (RCR):

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive

The UAA review committee determined the UAA supported removing the WBC recreational use designation, based on a lack of sufficient depth in the stream.

Summary of Comment(s):

(1) Landowner commented that his whole family swims in the creek. They collect aquatic life and bait for fishing in the creek. (2) Missouri Department of Conservation staff has observed people swimming in the creek. (3) Comment received that DNR should put full water quality protection in place. (4) UAA 0039: Survey was conducted at an unlikely time for WBC recreation. Less than three sites were evaluated. No hydrological study, water quality sampling, or interviews were conducted. A study of at least one year is necessary.

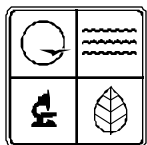

Commission Action on Comment(s):

**Commission Action:** ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive

Because of the comments received, the commission voted to retain the WBC recreational use designation for Turkey Creek from the mouth upstream to Section 21, Township 49 North, Range 2 West (21,49N,02W). The commission directed further investigation to determine specific locations and extent of recreational activities.

Final Order of Rulemaking:

The whole body contact recreational use designation will be retained on Turkey Creek in Lincoln county from the mouth upstream to 21,49N,02W (1.5 miles).
